Home page

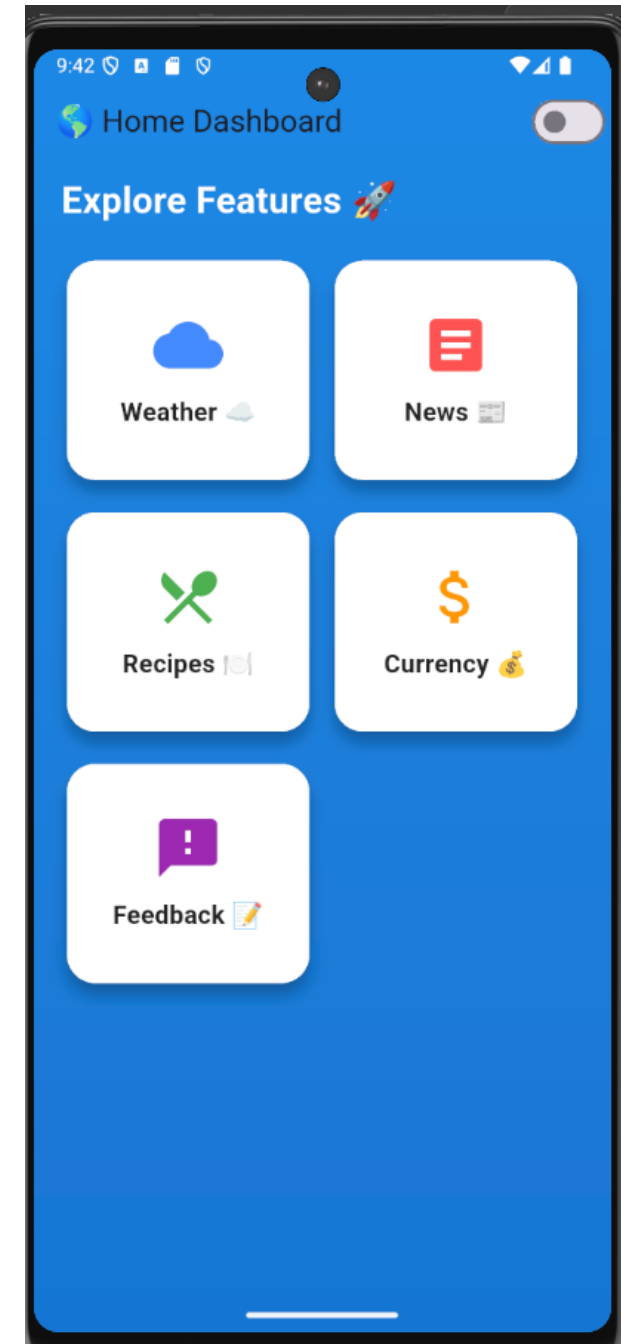

1 Weather page

2 News Page

3 Recipes Page

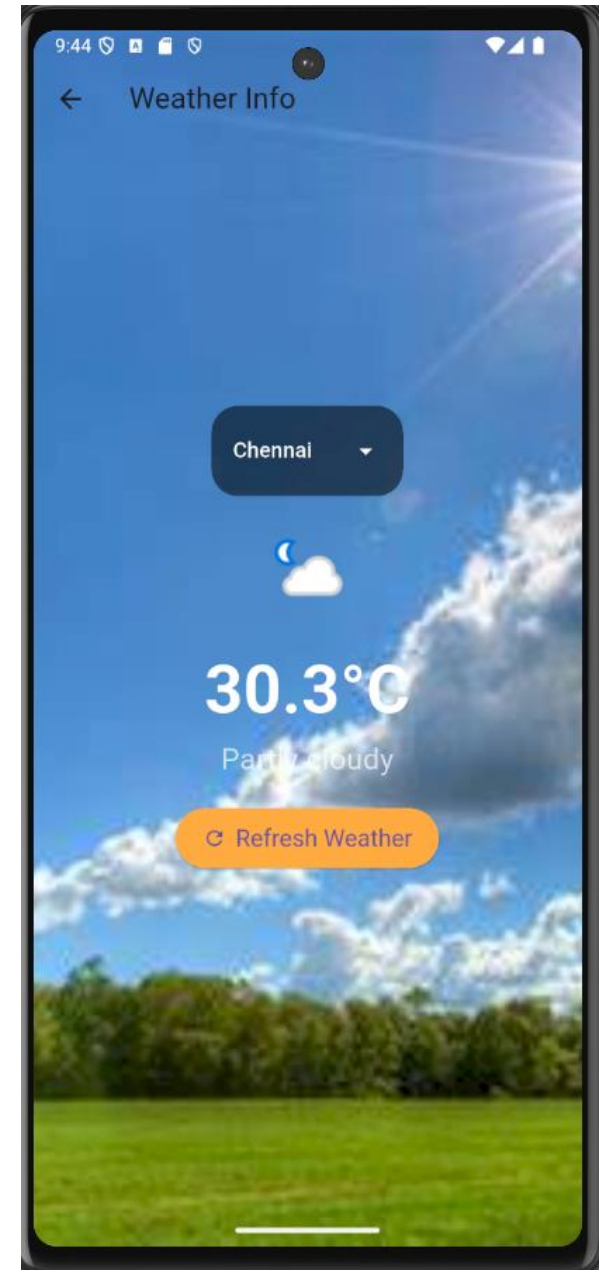

4 Currency converter

5 feedback Page

First page is a weather,
the update of the weather is coming
from weatherApi.org

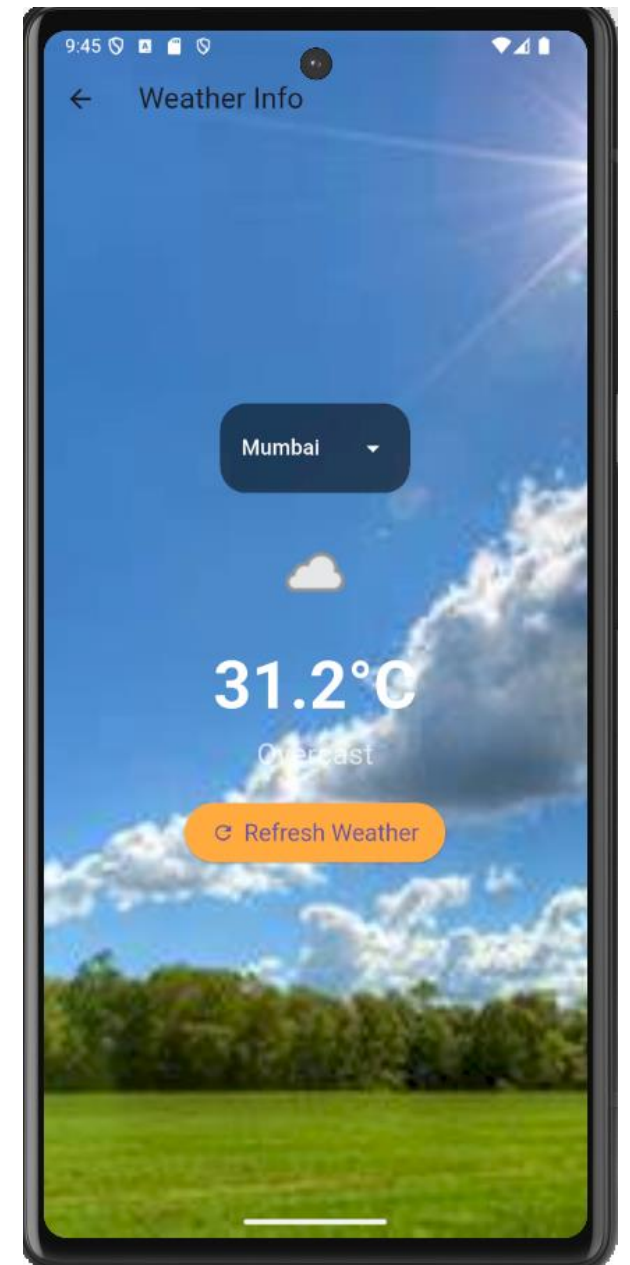

the background images are in
my assets if the temp >25 is shows
sunny image ,
if it is raining it shows rainy ,
if the temp <20 it shows snow image

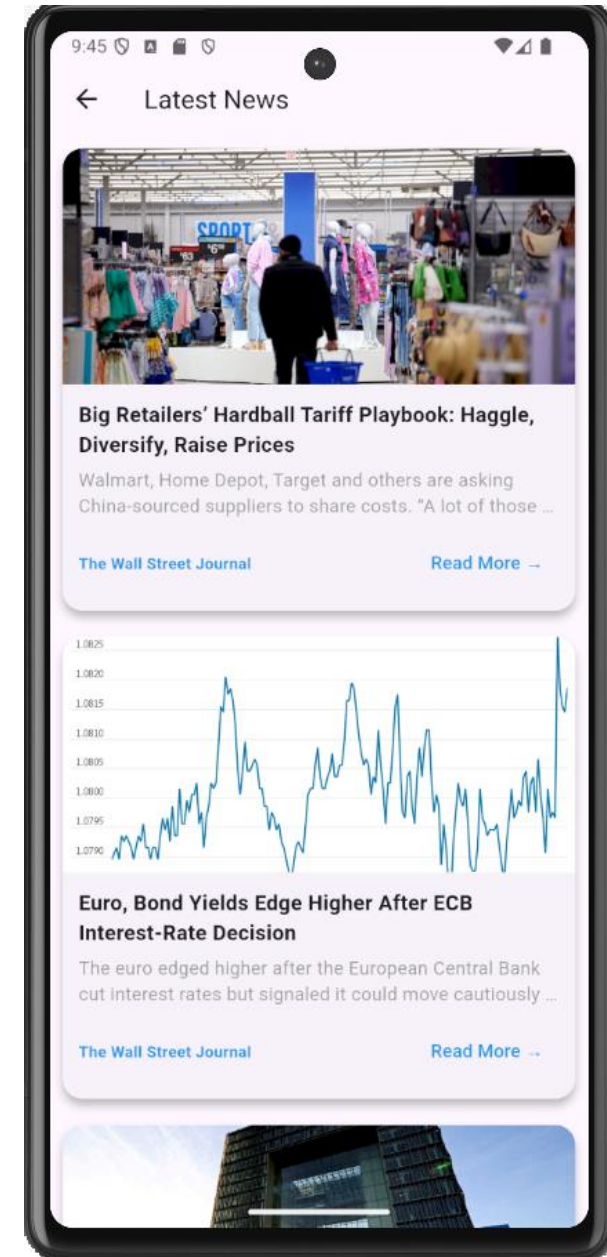

It has a dropdown that contains the list

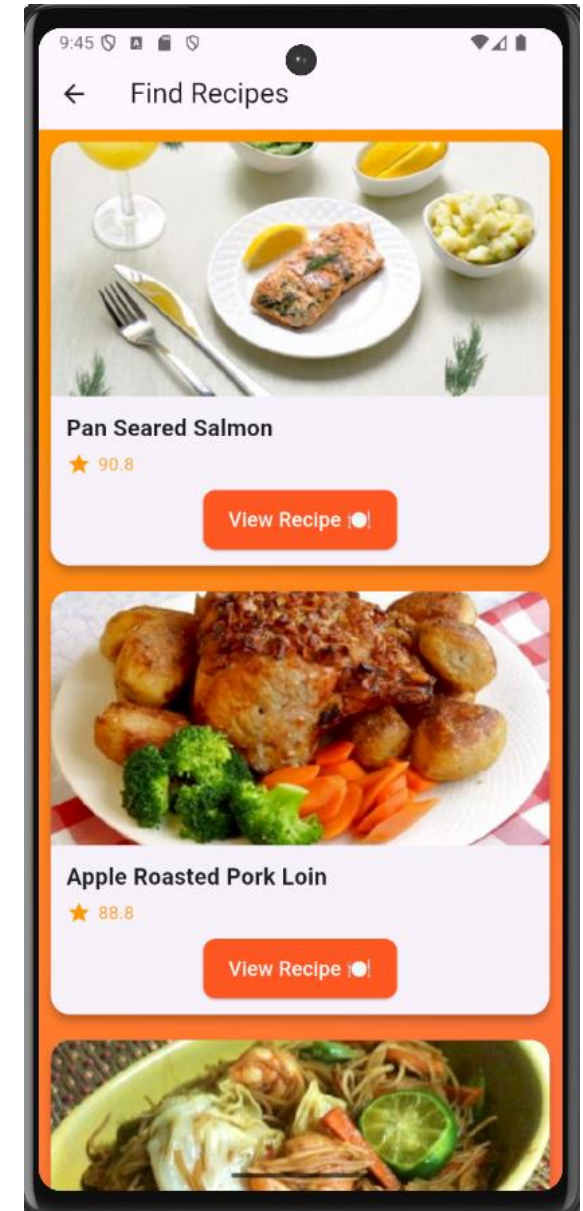

It shows the current weather of that particular city.

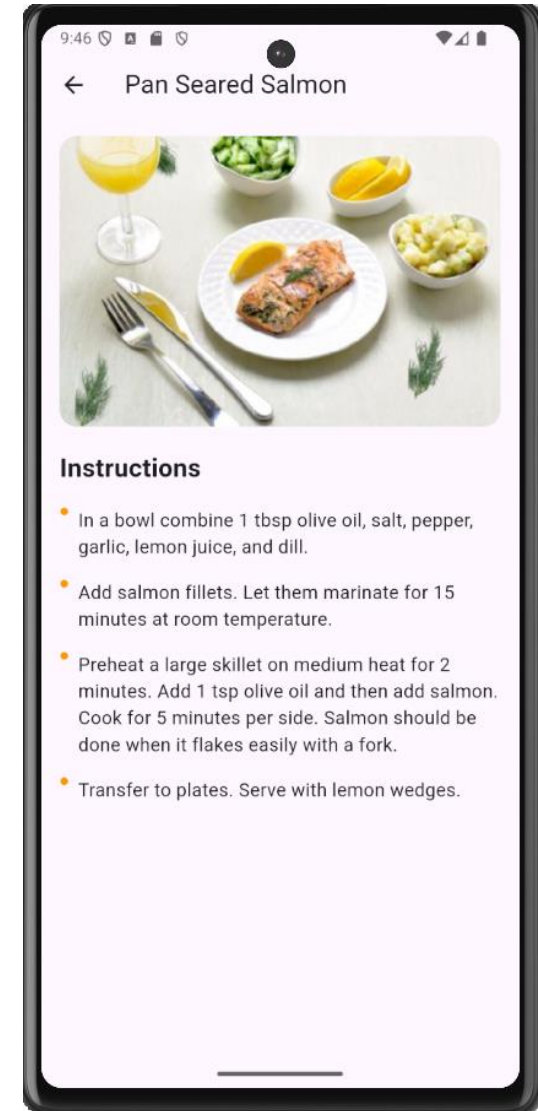

Second page is news page,
the news are comes from
newsApi.org and it displays in the
form of cards

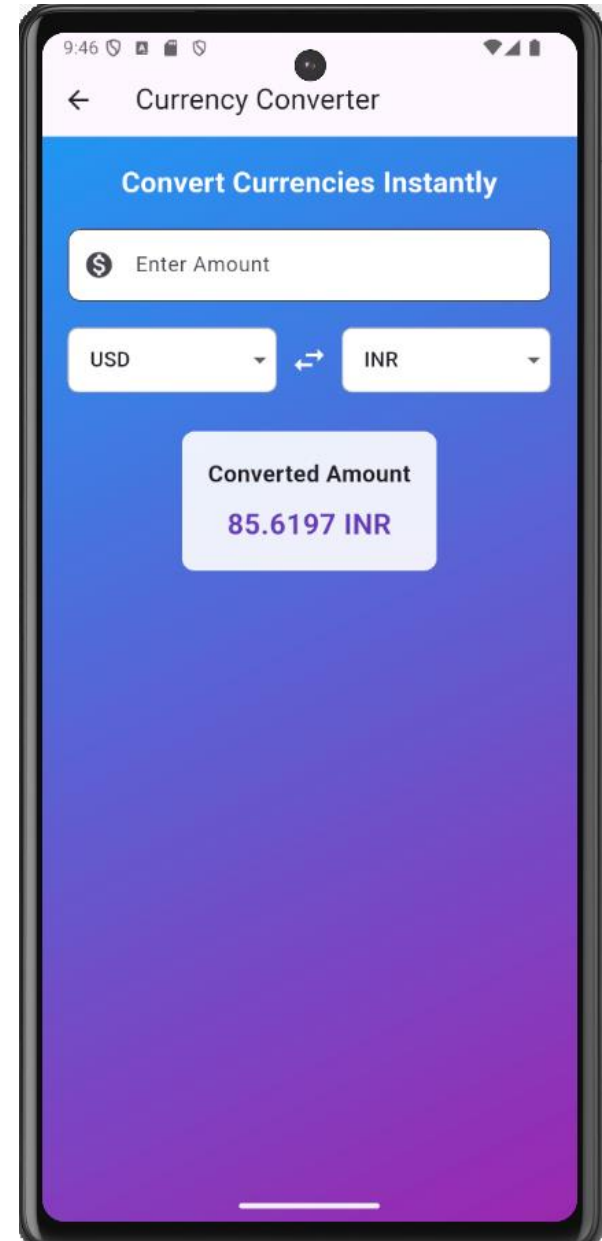

The third page is recipe ,
the recipe items are comes from
spoonacular.com

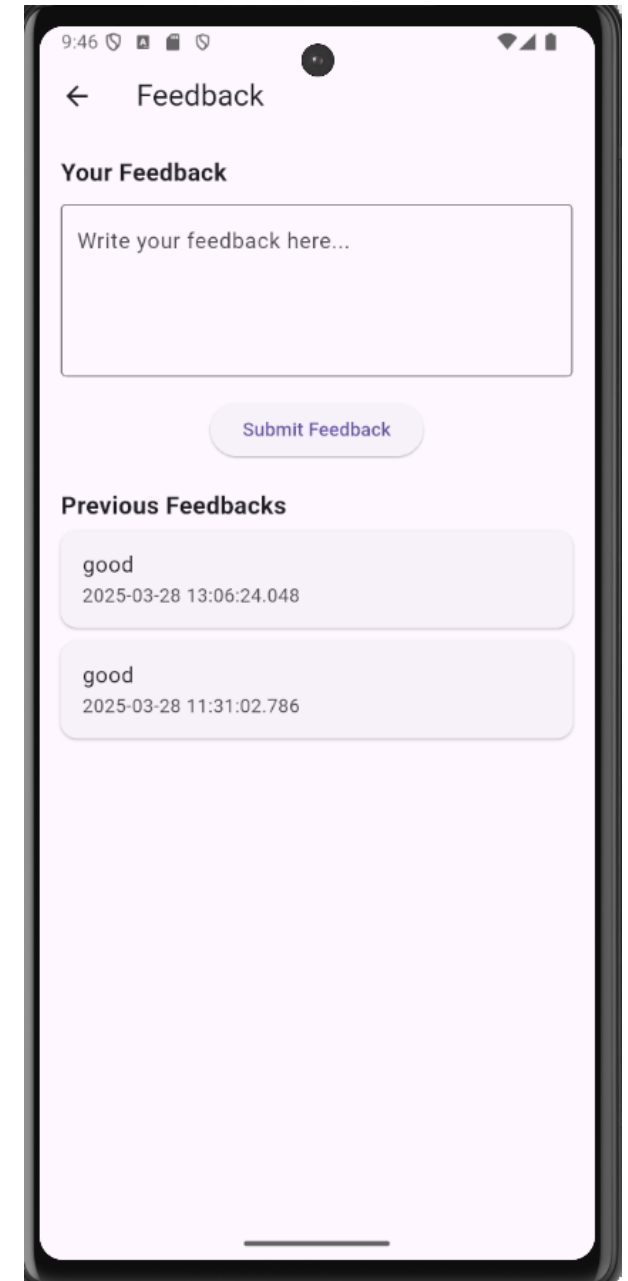

If we click view recipe , it opens the ingredient that also comes from the same api

The Fourth page is Currency Converter page, the value is updated from exchangerate-api.com

And the last page is feedback page

A mobile application interface for a feedback page. The page has a light pink background. At the top, there is a status bar with the time 9:46 and various icons. Below the status bar is a header with a back arrow and the word "Feedback". The main content area is divided into two sections. The first section, titled "Your Feedback", contains a large text input field with the placeholder text "Write your feedback here...". Below the input field is a rounded button labeled "Submit Feedback". The second section, titled "Previous Feedbacks", contains two feedback entries. Each entry is a light gray rounded rectangle with the text "good" and a timestamp. The first entry has a timestamp of "2025-03-28 13:06:24.048" and the second entry has a timestamp of "2025-03-28 11:31:02.786".
